

 OFFICIAL ENGINEERING & SYSTEMS HANDOVER

Sreevedaa Interior Design Studio

Comprehensive architectural specification, technology topology, deployment guidelines, and administrative handover documentation.

Client: Sreevedaa (Hyderabad)

Developer: Abhivorn Technologies

Release: Next.js 16 / React 19

 Status: Completed & Live

1

Project Details

Project Name	Sreevedaa
Project Type	Commercial Web Platform & Interior Architecture Showcase
Client	Sreevedaa (Hyderabad, Telangana, India)
Project Status	✓ Completed & Live
Primary Domain	https://skdesignstudio.info
Lead Ingestion API	https://skdesignstudio.info/api/contact
Developing Agency	Abhivorn Technologies
GitHub Repository	https://github.com/Abhivorn-Technologies/SK-DESIGN-STUDIO.git

2 Project Overview

Sreevedaa is an interior architecture and execution platform built for high-end residential, commercial, and turnkey design projects throughout Hyderabad and Telangana. The platform is engineered to combine brand presentation with client acquisition mechanics.

VISUAL PORTFOLIO

Spatial Taxonomy

Organized by room and discipline (Living, Kitchen, Balconies, False Ceilings) for quick client reference.

ACQUISITION

Lead Funnel

Integrated direct contact channels, walkthrough bookings, and instantaneous WhatsApp/Phone triggers.

PERFORMANCE

Sub-Second Loads

Powered by Next.js 16 on Vercel's global edge network with dynamic XML sitemaps and schema tags.

3 Technology Used

FRONTEND TIER

- ✓ **Framework:** Next.js 16.1.6 (App Router)
- ✓ **Core Library:** React 19.2.3
- ✓ **Language:** TypeScript 5 (Strict Mode)
- ✓ **Styling:** Tailwind CSS v4 & PostCSS
- ✓ **Typography:** Google Font Hanken_Grotesk via next/font

BACKEND & DATA

- ✓ **Runtime:** Node.js 20+
- ✓ **API Routes:** Next.js Server Route Handlers
- ✓ **Submissions:** JSON file storage (contact-submissions.json)
- ✓ **Content Model:** Centralized TypeScript store (siteContent.ts)
- ✓ **Legacy Assets:** High-fidelity rewrite rules (public/legacy/)

4

Website Features

Client-Facing Experience

- ✓ **Interactive Hero Section:** High-definition video background presentation with quick CTA.
- ✓ **Categorized Spatial Galleries:** Filterable by Drawing Room, Living Hall, Bathroom, Balcony, Kitchen, and Master Bedroom.
- ✓ **8 Specialized Service Pages:** In-depth engineering breakdowns:
 - False Ceilings & Acoustics
 - Electrical Fitouts & Smart Controls
 - Layered Lighting Design
 - Painting & Specialty Textures
 - Custom Woodwork & Storage
 - Furnishings & Soft Goods
 - Balcony & Terrace Landscaping
 - Civil Contracting & Turnkey Execution
- ✓ **Direct Channels:** Click-to-call (+91 97033 19319), direct mail, and WhatsApp hooks.
- ✓ **Mobile-First Interface:** Fluid breakpoints, sticky blur navigation, and responsive touch gestures.

Developer & Administrative Capabilities

- ✓ **Validated Lead Pipeline:** Phone and email payload sanitization with ISO timestamping.
- ✓ **Atomic Component Library:** Decoupled modules (ServiceCard, GalleryGrid, BlogCard, ContactForm).
- ✓ **Dynamic Sitemap Generation:** Automated /sitemap.xml generation to power daily Google search indexing.
- ✓ **Edge CI/CD:** Zero-downtime production deployment on pushes to origin main via Vercel.

5

Project Structure & Repository Topology

└─ README.md                              # Engineering instructions
```

6

Database & Data Storage

Data persistence is bifurcated between content models and captured inquiry leads:

STORAGE TARGET	TYPE / FILE	SCHEMA DETAILS
Lead Records	data/contact-submissions.json	{ name, email, phone, city, message, createdAt: ISO8601 }
Content Engine	src/data/siteContent.ts	Strongly-typed TypeScript objects for Hero copy, Services, Portfolio Media, and Contact details.

7

APIs & External Integrations

SERVICE / ENDPOINT	PROTOCOL / TYPE	PURPOSE & SCOPE
/api/contact	Internal Route Handler (POST)	Validates and serializes prospective client inquiries.
Google Fonts	next/font CDN	Serves Hanken_Grotesk with zero layout shift (CLS: 0).
Vercel Edge	Cloud Infrastructure	Global Anycast CDN caching, auto-SSL, and serverless compute.
Instagram	@skdesign_studio_	Visual engagement channel.
YouTube	@SKDesignStudio25	Video project walkthroughs.

8

Environment Variables

```
# Base URL for canonical links and dynamic sitemap indexing
NEXT_PUBLIC_SITE_URL=https://skdesignstudio.info

# Optional: Integration hooks for third-party email notification dispatch
# RESEND_API_KEY=re_your_api_key_here
# CONTACT_NOTIFICATION_EMAIL=skdesignsstudio.info@gmail.com
```

9

Deployment & Operations

 **Automated CI/CD Pipeline:** Pushes to the main branch automatically trigger production builds and edge distribution via Vercel.

- 1. **Pull Updates:** `git checkout main && git pull origin main`
- 2. **Dependency Sync:** `npm install`
- 3. **Build Verification:** `npm run build`
- 4. **Push to Production:** `git push origin main`

10

Accounts & Ownership

PLATFORM	ACCOUNT DETAILS	RESPONSIBLE OWNER
GitHub	Abhivorn-Technologies/SK-DESIGN-STUDIO	Abhivorn Technologies
Vercel	Team Hosting Account	Abhivorn Technologies / Client
Domain Registrar	Apex record skdesignstudio.info	Sreevedaa

11

Domain & DNS Details

Apex Domain	skdesignstudio.info
Vercel Anycast DNS	cname.vercel-dns.com (IP: 76.76.21.21)
SSL Certificate	Automated Let's Encrypt Wildcard SSL (Auto-renewing)
HSTS & HTTPS	Enforced across all incoming HTTP traffic

12

Roadmap & Recommended Actions

 **Serverless Ephemeral Storage Notice:** Because Vercel serverless functions run in ephemeral instances, entries written to `data/contact-submissions.json` do not persist permanently on serverless edges. It is strongly recommended to connect a transactional email provider (such as Resend or Brevo) or a managed DB (Supabase / MongoDB) in `src/app/api/contact/route.ts`.

Recommended Next

Transactional Mail

Direct email alerts to `skdesignsstudio.info@gmail.com` on lead submission.

In Progress

Native Migration

Port remaining legacy HTML pages to native React 19 Server Components.

Roadmap

Cloud Media CDN

Integrate Cloudinary or AWS S3 for direct client portfolio photo management.

13

Handover Sign-Off

Handover Complete: The project repository, build pipelines, domains, and core architectural components have been tested, validated, and documented for Sreevedaa.

``### What You Can Do With This Document 1. **Interactive Inline Editing:** Click the gold **"Enable Edit Mode"** button at the top to edit any paragraph, table cell, or bullet directly on your screen. 2. **Export to PDF:** Click the **"Print / Save as PDF"** button (or press ``Ctrl+P`` / ``Cmd+P``) to export a clean, multi-page PDF with no browser clutter. 3. **Copy into Google Docs:** If you want it inside Google Docs, open the preview, select all (``Ctrl+A`` / ``Cmd+A``), copy, and paste directly into a blank document at [docs.new] (<https://docs.new>)—all tables, colors, callouts, and typography will transfer cleanly.
